

DESIGN MANAGER

Arizona Water Company, an investor-owned public utility, is seeking a Design Manager in Apache Junction in the Superstition Division.

The Design Manager is responsible for managing the projects and personnel in the design group of the engineering department. The Design Manager manages the Company's in-house designs, design strategies, deliverables, and conformance with company standards. The Design Manager is responsible for coordinating and prioritizing the projects approved in the Construction Budget and tasks completed by the design group with direction from the Vice President – Engineering and input from the Engineering Manager.

Responsible for a variety of tasks and duties, which may include, but would not be limited to, the following:

- Manage the preparation of design plans, specifications, calculations, permitting documents, bid requests, and cost estimates of materials and labor.
- Manages the design and permitting schedules of all projects approved in the Construction Budget.
- With direction from the Vice President – Engineering, coordinates with Engineering Manager to prioritize all projects approved in the Construction Budget.
- Supervise the design group employees and manage the day-to-day workflow for the design group.
- Set clear direction and expectations for employees and communicate context and understanding of such direction.
- Oversee and participate in preparing and developing water main, water storage tanks and booster pump station construction plans and details.
- Oversee the design process and QA/QC for in-house completed designs.
- Develop and maintain the company's design standards and procedures
- Develop and maintain standard details for construction.
- Coordinate design plans and concepts with company Engineers and Division Managers.
- Coordinate and train new employees.
- Manage and evaluate department employees for all necessary training in company procedures, and other corrective disciplinary actions.
- Evaluate employee's performance and recommended compensation.
- Resolve conflicts between employees.
- Evaluate potential candidates for employment.
- Develop and maintain effective working relationship with surveyors, consultants, and permitting agencies.
- Assist Vice President – Engineering in preparing annual capital budget.
- Assist Vice President – Engineering in preparing supporting evidence, documents, and tables for rate case testimony.
- Knowledgeable and remaining current on relevant regulatory changes and/or updates, and appropriate codes.

Required knowledge, skills and abilities:

- Strong leadership, analytical, organizational, and problem-solving skills.
- Ability to supervise, motivate and train employees and recognize employee problems and
